Ahmed Samir

Senior Mobile Application Engineer (Flutter / Dart)

ahmedsamir1090a@gmail.com | +201009516972 | linkedin.com/in/ahmed-samir-92b24421b

PROFESSIONAL SUMMARY

Senior mobile engineer who builds Flutter apps for the parts of production that don't forgive shortcuts: weak connections, low-end devices, and user bases that keep growing. Founded Nasaq Care, a multi-tenant clinic management SaaS, and has shipped apps in healthcare, education, e-commerce, and travel. Focused on clean architecture, offline-first reliability, and releases that go out cleanly. BSc in Computer Science.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Clean Architecture, BLoC, Riverpod, Provider, Custom Widgets, Complex Animations, Method Channels (iOS/Android interop).

Networking & Cloud: REST APIs, GraphQL, WebSockets, gRPC basics, Firebase Suite, Supabase, OAuth2, JWT authentication.

DevOps & Testing: CI/CD (GitHub Actions, Codemagic, Fastlane), Docker, unit testing, widget testing, integration tests, Play Console, App Store Connect.

Performance: Dart DevTools, memory leak diagnosis, CPU profiling, frame budget optimization (60/120 FPS), Skia/Impeller.

Security & Payments: Secure Storage, SSL Pinning, token refresh, Mada, Apple Pay, Stripe, HyperPay.

AI & Emerging Tech: LLM API integration, Firebase ML, semantic search, prompt design.

PROFESSIONAL EXPERIENCE

Founder & Lead Engineer - Nasaq Care (Remote) Dec 2025 - Present

- Founded Nasaq Care, a multi-tenant, multi-branch clinic management SaaS (Flutter mobile/tablet + web) covering appointments, live queues, patient records, e-prescriptions, billing, and online booking.
- Built RBAC with per-clinic and per-branch data isolation, audit logging, real-time updates with polling fallback, and full Arabic/English RTL support.

Senior Flutter Developer - Al Oula Saudi (Remote) Apr 2026 - Sep 2026

- Led architectural modernization of the Airgo-SD multimodal travel platform, supporting thousands of daily booking queries.
- Introduced resilient caching and optimized API consumption, reducing data payload size by 30%.
- Shipped production releases for the Elnafaj and Sudan Space platforms with zero regression bugs.

Flutter Developer - Webb2 (Libya, Remote) May 2025 - Apr 2026

- Architected the Al-Idah education app, scaling to 10,000+ active students with offline lesson caching.
- Increased checkout conversion by 15% by streamlining the payment gateway flow to two steps.
- Optimized widget rendering to sustain 60 FPS across low-end and high-end devices.
- Established incident-management protocols and structured release pipelines for continuous delivery.

Flutter Developer - Slock Store (Saudi Arabia, Remote) Oct 2024 - Apr 2025

- Built the e-commerce app from scratch; achieved a 99.8% crash-free session rate with Crashlytics.
- Created a reusable design-system UI library, reducing feature turnaround time by 30%.
- Integrated Mada and Apple Pay payment gateways with automated webhook reconciliation.
- Designed push-notification flows that increased repeat purchases by 20%.

Flutter Developer - Alafnan Information Technology (Iraq, Remote) Apr 2024 - Oct 2024

- Delivered multi-tenant apps from a shared Flutter codebase, accelerating delivery by 40%.
- Integrated Google Maps SDK and geolocation services, increasing user session duration by 20%.
- Reduced cold-start time by 35% through tree-shaking, code splitting, and deferred component loading.
- Documented microservice API contracts and client-side data schema validation.

Flutter Developer - Supplinker (Saudi Arabia, Remote) Aug 2023 - Feb 2024

- Built a B2B invoicing solution processing 10,000+ monthly documents with local SQLite/Hive caching.
- Applied BLoC reactive state patterns to eliminate race conditions during high-volume document generation.
- Reduced client-server bandwidth by 25% through payload delta synchronization.
- Partnered with corporate clients to refine the offline invoice validation and export engine.

Flutter Developer - Freelancer (Global Platforms) Sep 2022 - Aug 2023

- Engineered responsive cross-platform Flutter applications for international clients on Khamsat.
- Refactored legacy codebases, resolving state-management bottlenecks and integrating modern REST APIs.
- Maintained a 100% 5-star client satisfaction rating with clean, documented, production-ready code.

SELECTED PROJECTS

Nasaq Care - Multi-Tenant Clinic Management SaaS - nasaqcare.com
Clinic operations platform for appointments, live queues, patient records, e-prescriptions, billing, and public online booking.
Tech: Flutter, Dart, BLoC, Laravel, WebSockets, Firebase, Hive, Playwright.

Airgo-SD Travel Booking Ecosystem - airgo-sd.net
Multimodal booking platform for flights, buses, and boats with real-time seat selection and instant ticketing.
Tech: Flutter, Dart, BLoC, REST APIs, Firebase, CI/CD.

Sudan Space Digital Platform - sudanspace.com
Web and mobile application suite with complex state management, multilingual support, and enterprise authentication.
Tech: Flutter, Dart, Riverpod, GraphQL, OAuth2.

Slock Store E-commerce Platform - slockstore.com
High-performance shopping app with sub-second catalog queries and regional payment integration.
Tech: Flutter, Firebase, Crashlytics, Mada, Apple Pay.

EDUCATION

Bachelor of Science in Computer Science
Faculty of Computers and Artificial Intelligence, Beni-Suef University - Sep 2019 - Jun 2023
Grade: Very Good | GPA: 3.18 / 4.00

CERTIFICATIONS

Advanced Mobile Architecture - Clean Architecture, Reactive BLoC & Offline Sync
